State	Finished
Completed on	Wednesday, 5 August 2026, 8:49 AM
Time taken	10 mins 57 secs
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void function (int n)
{
    int i= 1;
```

```
    int s =1;
```

```
    while(s <= n)
    {
         i++;
         s += i;
     }
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

For example:

Input	Result
9	12

Answer: (penalty regime: 0 %)

```c
#include<stdio.h>

void fn(int n){
    int c=0;
    int i=1;
    c++;
    int s=1;
    c++;

    while(s<=n){
        c++;
        i++;
        c++;

        s+=i;
        c++;
    }
    c++;

    printf("%d\n",c);
}
int main(){
    int n;
    scanf("%d",&n);
    fn(n);
    return 0;
}
```

	Input	Expected	Got	
✔	9	12	12	✔
✔	4	9	9	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
